

Exclusive Offer for ExoClock Members: 50% Off Telescope Live Yearly Membership Cards

As a valued ExoClock member, enjoy a special 50% discount on all Yearly Membership Cards from Telescope Live, a long-standing ExoClock project partner. While Telescope Live primarily serves astrophotographers, it was designed by astronomy researchers for astronomers.

Our top-quality telescopes are situated in prime locations and can be utilised for various astronomical observations. Use our largest 60cm and 70cm telescopes for exoplanet or supernova follow-ups, or leverage our wide-field view telescopes for sky surveys.

To access our telescope network for astrophotography or research, you'll need Telescope Live credits for submitting observations or downloading ready-to-use datasets.

HOW MANY CREDITS DO I NEED?

1 credit allows you to download a typical One-Click Observation (which corresponds to about 1 hour of total exposure time); with this dataset you can create a fairly good picture.

10 credits allow you to download a typical Observation Bundle (with about 11 hours of total exposure time); such datasets allow you to produce a truly stunning picture!

100 credits allow you to use our telescopes exclusively for about 1 hour (although this depends heavily on the telescope used, moon discounts, and other factors - ask our staff for more details).

	Bronze	Silver	Gold
Price dedicated to ExoClock members (50% off)	£48 £24	£240 £120	£600 £300
